SUMMARY

B.Tech CSE student with a strong passion for cloud computing. Currently strengthening skills in Data Structures, Cloud technologies, and Web Development. Quick learner, always eager to explore new skills.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering
Parul Institute of Engineering and Technology, waghodia | 08/2023 – 07/2027 | GPA: 3.48
School Leaving Certificate (Grade XII), Science
Arniko Awasiya Secondary School, Biratnagar, Morang | 2021 – 2023
Secondary Education Examination (Grade 10)
Lotus Eng. Boarding School, Lahan-8 | 2021

PROJECTS

MindEase – AI Depression Risk Assessment Tool
Team Project | Python, Flask, scikit-learn, HTML/CSS/JS | 08/2025

- Built a mental health journaling web app that uses a machine learning model to assess depression risk from user-written journal entries, returning a risk level (Low/Moderate/High) with a confidence score.
- Owned the backend: developed the Flask REST API, trained and serialized the text classification model using scikit-learn (TF-IDF vectorization + prediction pipeline), and exposed a **/predict** endpoint for real-time analysis.
- Collaborated with teammates on the frontend (authentication flow, chat interface, dark/light theme) built with HTML/CSS/JS.

TVS Raj Automobiles – Bike Dealership Management System *Solo Project | React (Vite), Supabase (PostgreSQL), Vercel | 2025*

- Designed and built a full-stack web application for a bike dealership covering customer inquiries, stock management, and sales tracking, with role-based access split across customer, employee, and owner/admin views.
- Implemented a public-facing flow where customers submit purchase inquiries for specific bike models with their contact details.
- Built an employee/owner panel (hidden from customers) to log bike sales against customer details, manage stock levels, and add new bike models to the catalog, with sales and stock records made available to the owner for record-keeping.
- Handled the project solo end-to-end: schema design in Supabase, role-based access logic, and the full React frontend, deployed on Vercel.

CERTIFICATIONS

- **AWS Academy Graduate – AWS Academy Cloud Foundations**, Amazon Web Services — Skills: AWS Architecture, AWS Cloud, Core Services, Pricing, Support (Issued: August 2025)
- **SQL (Basic Certificate)**, HackerRank (Issued: 2025)
- **Cloud Technical Series: AI Agents Edition**, Google Cloud (Attended: August 2025)
- **Introduction to IoT and Digital Transformation**, Cisco Networking Academy (Issued: February 2025)
- **Certificate of Participation: Hack Node India**, BlockseBlock (Issued: August 2025)

SKILLS

Languages: C, C++, Java, Python, SQL
Web: HTML, CSS, JavaScript (basic)
Cloud & Tools: AWS, Google Cloud (intro), Linux basics, Networking fundamentals
AI/ML: scikit-learn (applied), AI agent concepts

LANGUAGES SPOKEN

English (Fluent) • Hindi (Fluent) • Nepali (Native)
